

# 4" SS Surface Post Mount Installation Instructions

Part # F-42592

## SS Post Mount Installation

- 1) Locate post center
- 2) Locate and mark hole locations for anchors.
- 3) Insert mounting plate into slots on mount and center up holes.
- 4) Be sure that base is square to railing lines. Install post mount using (4) 5/16" concrete anchors or comparable fasteners. (anchors are not provided) (Fig.1) Make sure to drive the anchors down far enough so that the post skirts (not included) will not hit the top of the anchors. If anchoring to wood, use 5/16" bolts or lags.
- 5) Level mount and shim where necessary. Tighten up bolts.
- 6) Slide post over mount and recheck leveling. Continue with railing installation.

**Care and Cleaning** —Ordinary dirt and mud usually washes off with a hose. At times it may be necessary to use a non-abrasive household cleaner to remove residue and then rinse with a hose.
